

Division with Visual Area Models

Name: _____

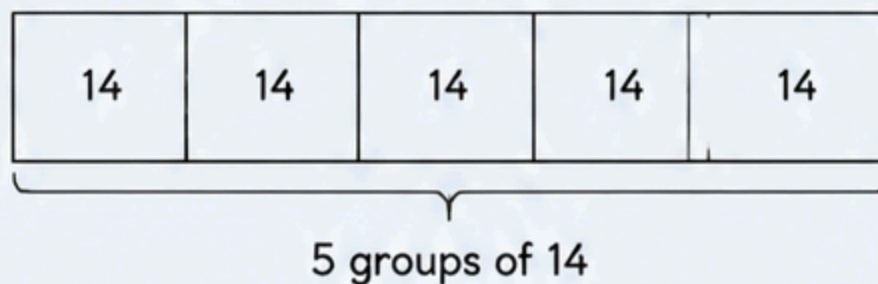

Date: _____

Use rectangular area models to show how the dividend can be partitioned into groups.

Draw and label your models, and write the division statement for each problem.

Example

$72 \div 5$

So, $72 \div 5 = 14 \text{ r } 2$
(2 left over)

1. $48 \div 6$

Division statement: _____

2. $63 \div 7$

--	--	--	--	--	--	--

Division statement: _____

3. $55 \div 8$

--	--	--	--	--	--	--	--

Division statement: _____

4. $90 \div 9$

--	--	--	--	--	--	--	--

Division statement: _____

5. $76 \div 5$

--	--	--	--	--

Division statement: _____

6. $84 \div 6$

--	--	--	--	--	--

Division statement: _____

7. $68 \div 7$

--	--	--	--	--	--	--

Division statement: _____

8. $95 \div 8$

--	--	--	--	--	--	--	--

Division statement: _____
